- On the next page, you will see the Video Replay and the links to the Slide Decks. Click which Slide would you like view. (Note: you will need to download the files the first time)

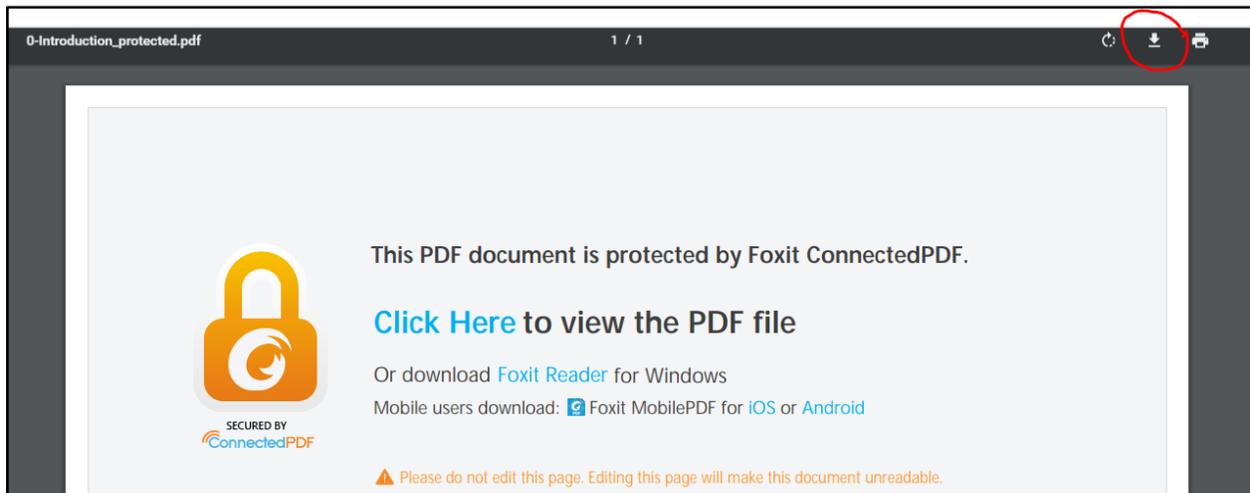

Module Resources

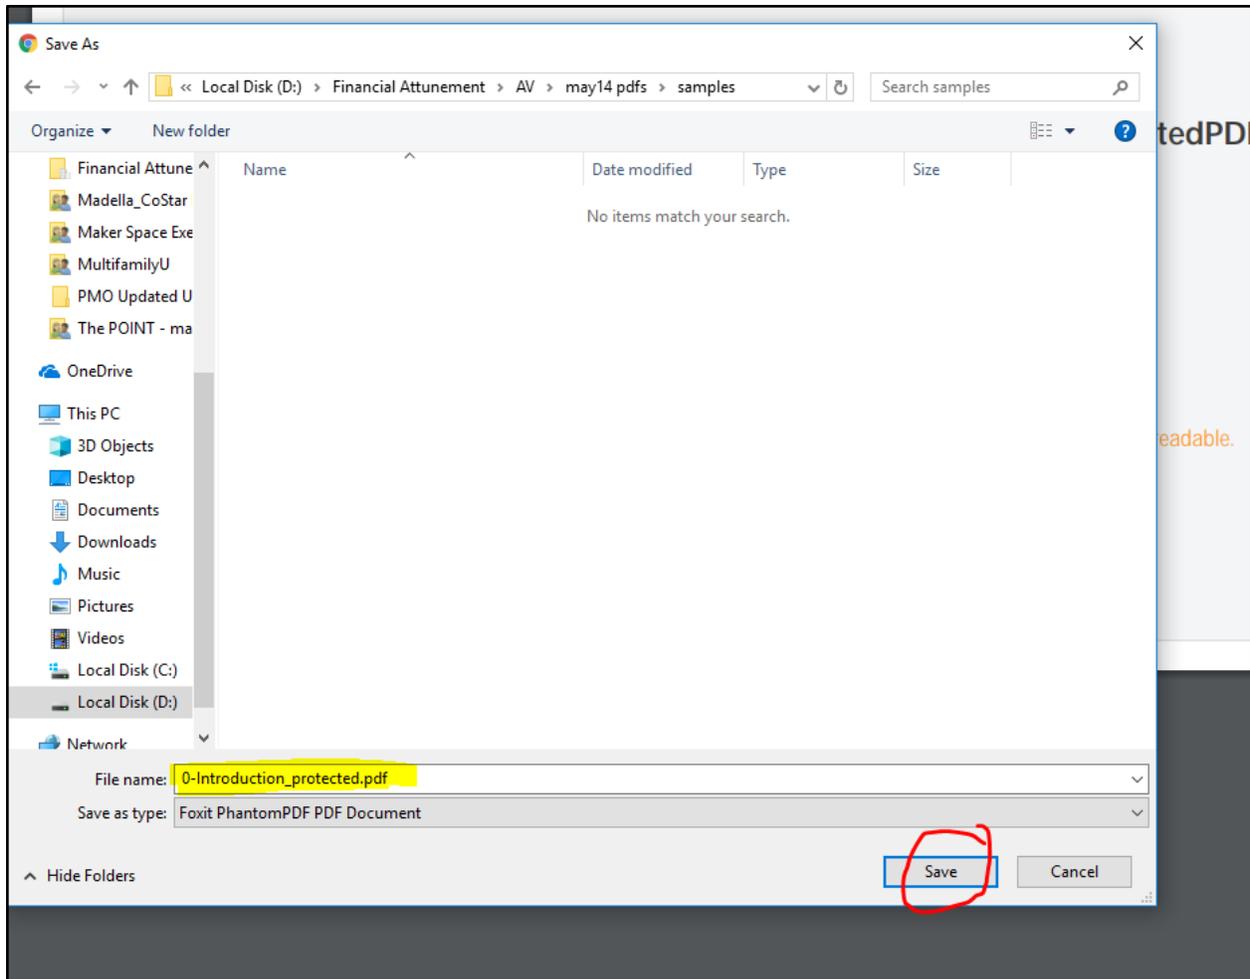

0 - INTRODUCTION ▶

1 - MULTIFAMILY & SYNDICATION FUNDAMENTALS ▶

(Click the modules above to download them. From your computer, open the files using the Foxit Reader)

- After clicking the button for the Slide Deck, another page will open, click the **icon that looks like an arrow pointing down with a line** to download the file, then save on your computer.

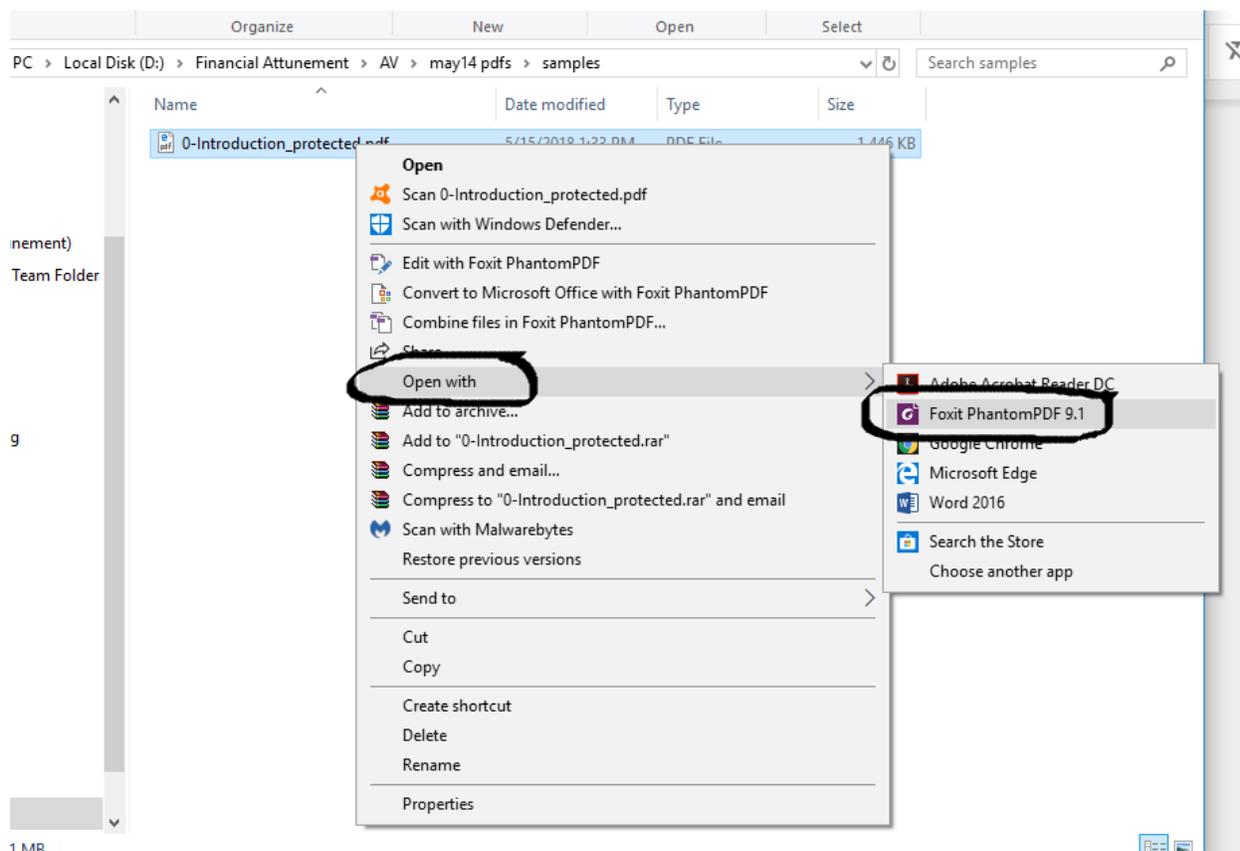

- From your computer, open the files using Foxit.
- If you haven't downloaded Foxit Software yet, download it from: <https://www.foxitsoftware.com/downloads/>.

Important – It's the *FIFTH* link on the page. If you are going to use a tablet or a phone, you can download it from the Android or Apple app store. Search for Foxit reader. This is the only PDF software that can read the protected pdfs.

To use it, you must create an account. Be sure to use the same email address you used when you created your Student Portal account.

Once you have logged into Foxit, you can open the files you have downloaded.

- Find the files and right click them, choose **Open With** then **Foxit Phantom PDF 9.1** or **Foxit Reader**

Note: There's a known error when we try to open the files on a MAC computer, if you are using the Foxit Reader. We contacted Foxit Support and they mentioned that there is a limited access for MAC users. We have opened a ticket and they are working on fixing this. If you try to open or view the files on MAC, we would appreciate any feedback from you.

While we are getting the issue fixed, you can try using a Windows PC or Android tablet instead.
